3. The ENC, RWS&S, Hyderabad has also stated that the geologist has suggested existing open well at Monditogu(v) to provide drinking water to all these (7) habs duly reporting that the existing openwell is having sufficient yield as the sub soils are highly potential and irrigation tank is located upside of proposed well. A small stream is passing side of the proposed well. Hence the proposed well is sustainable to cater to the demand even in summer. Based on the Geologist report the SE has conducted the yield test & water analysis tests and found that the existing Open well is sustainable and yielding sufficient yield (5801pm) of Potable water against the requirement of 397 Ipm. Hence the Superintending Engineer has propose MVS scheme, by constructing the GLBR over Hillock and laying P/M & G/M to the proposed (3) OHSRS from the existing open well near Mondithogu (V) of Rompaidu GP, as common source duly widening and deepening the well. Further the SE has reported that the proposal for diversion of Forest land (for construction of Head works (Developing Open well, GLBR, P/M) certain length of G/M) is under process with the Pr. Chief conservator of Forests. A.P. Hence the Superintending Engineer, RWS&S, Khammam vide Lr.No.T2/SVS Conversion/2013, dt.27.11.2013, has also further stated that the Detailed Project report with a nomenclature, "MVS at 24 area Ambedkar nagar and other (6) habs of GP Rompaidu" with an estimate cost of Rs.154.10 lakhs against the sanctioned amount of Rs.154.10 lakhs towards these (7) SVS works and requested for favour of according administrative sanction. He has submit that the cost of the proposed MVS scheme is Rs.154.10 lakkhs against the total sanction of Rs.154.10 lakhs towards these (7) habitations. As such there is no additional burden to the government for converting into MVS instead of (7) SVS works.
